Contents Volume 185 (1996)

Editorial **ix–x**

Opinion articles

Regulation of shoot/root ratio by cytokinins from roots in *Urtica dioica*: Opinion
E.H. Beck **3–12**

Regulation of root weight ratio is mediated by sucrose: Opinion
J. Farrar **13–19**

Carbon allocation to shoots and roots in relation to nitrogen supply is mediated by cytokinins and sucrose: Opinion
A. van der Werf, O.W. Nagel **21–32**

Is coordination of leaf and root growth mediated by abscisic acid? Opinion
R. Munns, G.R. Cramer **33–49**

Plant growth modelling and the integration of shoot and root activities without communicating messengers: Opinion
J.M. Cheeseman, R. Barreiro, M. Lexa **51–64**

Modelling whole-plant allocation in relation to carbon and nitrogen supply: Coordination versus optimization: Opinion
J.F. Reynolds, J. Chen **65–74**

The ecological significance of plasticity in root weight ratio in response to nitrogen: Opinion
H.L. Reynolds, C. D'Antonio **75–97**

Regular research articles

Modelling crop growth and biomass partitioning to shoots and roots in relation to nitrogen and water availability, using a maximisation principle. I.Model description and validation
J. Kleemola, M. Teittinen, T. Karvonen **101–111**

Effects of nutrient supply (NPK) on spring wheat response to elevated atmospheric CO_2
J. Wolf **113–123**

Modelling the effect of varying soil water on root growth dynamics of annual crops
S.G.K. Adiku, R.D. Braddock, C.W. Rose **125–135**

Effect of soil drying on growth, biomass allocation and leaf gas exchange of two annual grass species
T. Kalapos, R. van den Boogaard, H. Lambers **137–149**

Soil structure and plant growth: Impact of bulk density and biopores
R.J. Stirzaker, J.B. Passioura, Y. Wilms **151–162**

A telescopic method for photographing within 8 × 8 cm minirhizotrons
G. Poelman, J. van de Koppel, G. Brouwer **163–167**

Selected Papers of a Meeting on ARBUSCULAR MYCORRHIZAS IN SUSTAINABLE SOIL-PLANT SYSTEMS held in Barcelona, Spain, April 27–30, 1995

Guest Editors: J.M. Barea, C. Calvet, V. Estaún and A. Camprubi

Preface
S. Gianinazzi, H. Schuepp **169**

Biological control as a key component in sustainable agriculture
J.M. Barea, C. Calvet, V. Estaún, A. Camprubi **171–172**

Effects of arbuscular mycorrhiza (AM) on health of *Linum usitatissimum* L. infected by fungal pathogens
G.D. Dugassa, H. von Alten, F. Schönbeck **173–182**

Interactions between migratory endoparasitic nematodes and arbuscular mycorrhizal fungi in perennial crops: A review
J. Pinochet, C. Calvet, A. Camprubí, C. Fernández **183–190**

Arbuscular mycorrhizal fungal-induced alteration to root architecture in strawberry and induced resistance to the root pathogen *Phytophthora fragariae*
J.R. Norman, D. Atkinson, J.E. Hooker **191–198**

Interactions between the soilborne root pathogen *Phytophthora nicotianae* var.: *parasitica* and the arbuscular mycorrhizal fungus *Glomus mosseae* in tomato plants
A. Trotta, G.C. Varese, E. Gnavi, A. Fusconi, S. Sampò, G. Berta **199–209**

Plant hydrolytic enzymes (chitinases and β-1,3-glucanases) in root reactions to pathogenic and symbiotic microorganisms
E. Dumas-Gaudot, S. Slezack, B. Dassi, M. Pozo, V. Gianinazzi-Pearson and S. Gianinazzi **211–221**

Colonisation patterns of root tissues by *Phytophthora nicotianae* var. *parasitica* related to reduced disease in mycorrhizal tomato
C. Cordier, S. Gianinazzi, V. Gianinazzi-Pearson **223–232**

Genotype-dependence in the interaction between *Glomus fistulosum*, *Phytophthora fragariae* and the wild strawberry (*Fragaria vesca*)
G.L. Mark, A.C. Cassells **233–239**

Occurrence of phytoalexins and phenolic compounds in endomycorrhizal interactions, and their potential role in biological control
D. Morandi **241–251**

Selected Papers of the MINIRHIZOTRON Workshop held in Båstad, Sweden, September 17–20, 1995

Guest Editor: H. Majdi

Root sampling methods – applications and limitations of the minirhizotron technique
H. Majdi **255–258**

Recording, processing and analysis of grass root images from a rhizotron
O. Andrén, H. Elmquist, A.-C. Hansson **259-264**

Root dynamics in a salt marsh over three consecutive years
W. Steinke, D.J. von Willert, F.A. Austenfeld **265–269**

Root growth dynamics of Brussels sprouts (*Brassica olearacea* var. *gemmifera*) and leeks (*Allium porrum* L.) as reflected by root length, root colour and UV fluorescence
A.L. Smit, A. Zuin **271–280**

Fine root demography in alfalfa (*Medicago sativa* L.)
G.D. Goins, M.P. Russelle **281–291**

Applications of minirhizotrons to understand root function in forests and other natural ecosystems
R.L. Hendrick, K.S. Pregitzer **293–304**

Does liquid fertilization affect fine root dynamics and lifespan of mycorrhizal short roots?
H. Majdi, J.-E. Nylund **305–309**

Volume contents **311–313**

Author index **314**
